Safari offers an integrated OMS to streamline your operations and increase efficiency.

2-Way Fix & Drop Copy Messaging

With our advanced OMS Console, you can manage order flow and positions in real-time, as well as set and update pre-trade risk controls.

API functionality

Safari OMS provides rest API connectivity and real time reporting on activity and positions

Global Connectivity

Safari's infrastructure solutions provide on-demand custom development options, as well as 24/7 connectivity to numerous exchanges and trading networks.

Compliance Reporting

Safari OMS will seamlessly integrate into your existing back-office processes with support for intra-day or end-of-day compliance reporting and detailed trade reporting.

Single or Multiple Clearing Firms

A single OMS to interact with single or multiple clearing firms.

SAFARI OMS

The Safari OMS is a high-performance order processing system that provides customers with real-time balances and positions, customizable risk controls, and broad reporting capabilities.

HIGHLIGHTS:
